

"Innovations in Science and Technology for Inclusive Development"

16th February 2018

Under the auspices of
Savitribai Phule Pune University, Pune.

Jointly Organized by
LUTJF'S

DR. SUDHAKAR JADHAVAR ARTS, COMMERCE & SCIENCE COLLEGE

Theme of the state level Seminar

A country can experience sustained growth only on the basis of scientific and technological progress. The institutional can democratize the process of knowledge creation by making it participatory and enabling the grass root individual to contribute to the process of innovation. It must be remembered that concepts like sustainable agriculture, organic farming, waste water management, water harvesting, clean and renewable energy are those that have originated in ancient times. It is the task of the institutions of modern science and technology to mould these concept and makes them relevant and meaningful to todays and tomorrows world. The innovative field of science are all multi disciplinary . The science and technology develops most when they are participatory but this participation must be multidimensional . It must include all section of society and al disciplines.
