4.1.1 - The Institution has adequate infrastructure and physical facilities for teaching-learning. viz., classrooms, laboratories, computing equipment etc.

College has enhanced the infrastructure to facilitate effective teaching and learning with a view to cope with increasing needs strength of the students in different streams. According to the requirements of various courses, the college has set the policy to augment the infrastructure facilities, namely classrooms, laboratories and library facilities. The college attempts to optimally utilize the infrastructural facilities and resources to carry out the curricular, co-curricular and extra-curricular activities. We are consciously making our infrastructure friendly for the students. We have a better access to the learning resources.

Available Facilities:

1. Classrooms:

The college has sufficient number of classrooms. Sufficient classrooms have IT facilities that could help to students to get the lecture very effectively, even teachers are able to make their teaching effectively. There are sufficient classrooms that we could conduct framed time table of the college.

2. Examination Cell:

There is an Examination Cell in the college which takes responsibility to monitor all the examinations related to continuous Internal Assessment and University being conducted. Well qualified and experienced teaching faculties have been given responsibility to care of this work.

3. Laboratories:

College has well furnished laboratories. All the necessary equipments are available in it.

4. Specialized facilities and Equipments:

The college has specialized facilities for teaching, learning and research. There are sufficient classrooms equipped with LCD projectors and screens.

5. CCTV Camera: Every important place CCTV cameras are installed for surveillance, which reduces the unnecessary problems for activities are being in controlled manner. 75 CCTV cameras were installed in the campus.

6. Auditorium/Seminar Hall:

A multipurpose hall with a seating capacity of 1000 students is available in the college. This hall is equipped with well facilities that are required.

7. Solar Panel System:

Acknowledging the advantages of solar panels, college has set up solar panel system on the roofs of the building. It has helped to reduce the pollution in the campus. Even it one of the steps of the college to create its own resources to meet the needs of the infrastructure.

8. Other Facilities:

All the departments have separate rooms for the staff members. Each department is provided with one computer system to make the records digital, first aid box and other required facilities. The college offers its venue to organize the common sports and games events and cultural programmes. The college provides purified drinking water to all the students and staff in the campus. Car/Bike parking are available for boys and girls.

9. Fire Extinguishers are available in the college campus for the emergency purpose. Even college has water purifier for the students and staff on every floor. It is regularly maintained. Keeping in view the hygiene of the students and staff members, college has washrooms for girls and boys on every floor of the building. The cleanliness of it is maintained regularly.
